Aggregate current interviews

Privacy-safe release decision

The working report contains company names, job titles, application dates, locations, status notes, and aging fields. Those record-level details are intentionally excluded from the public portfolio version.

Capabilities demonstrated

- Searchable detail table
- Cross-filtering and slicers
- Current-opportunity KPI
- Record-level aging logic

Synthetic demonstration table

Fictional records shown only to demonstrate the public schema and table behavior.

Company	Job Title	Category	Applied	Status	Days Open
Northstar Analytics	Business Systems Analyst	Business Analysis	May 12, 2026	Interview	49
Cedar Ridge Systems	Data Analyst	Data & Analytics	May 26, 2026	Pending	35
Blue Mesa Consulting	Operations Analyst	Operations	Jun 4, 2026	Pending	26
Summit Peak Tech	IT Analyst	IT & Infrastructure	Jun 18, 2026	Role Closed	12

All names and records on this page are fictional. The original operational view remains private.

About & Definitions

About & Definitions

Purpose, data source, metric definitions, assumptions, and guidance for responsible interpretation.

Dashboard Purpose

This dashboard converts a manual job-application tracker into a decision-support tool.
Primary goals: understand pipeline health, monitor interviews and aging pending records, and compare outcomes by role category and source.

Data Source & Refresh

Source: Recruiting_Analytics_PowerBI_Cleaned.xlsx → PowerBICleanTable.
Analytical baseline: 252 records after three documented duplicate exclusions.
Refresh the model after adding or updating valid rows in the structured Excel table.

Status Definitions

Pending — no confirmed final employer decision.
Interview — active interview opportunity.
Rejected — employer confirmed the application will not proceed.
Role Closed — position closed, canceled, or no longer available.
Statuses represent the latest known outcome, not a complete history of status changes.

KPI Definitions

Total Applications — distinct count of Application ID.
Interview Rate — Interview Applications ÷ Total Applications.
Rejection Rate — Rejected Applications ÷ Total Applications.
Pending aging — current date minus Date Applied for records still marked Pending.
Role/source comparisons show current outcomes using the selected filters.

Assumptions & Known Limitations

43 application sources remain Unknown and are kept visible.
Work Type is largely incomplete, so work-arrangement analysis is deferred.
Hourly and annual salary records must not be averaged together.
The dataset does not contain follow-up dates, contact history, interview stages, or rejection reasons.

How to Use the Dashboard

1. Start with Executive Overview for pipeline health.
2. Use Performance & Strategy to compare categories, sources, and aging.
3. Use Application Details to inspect individual records.
4. Clear slicers before making broad comparisons and document decisions outside the report.
